Comprehensive Dashboard Analysis Report for Multi-Channel Fashion Retail | India Market

Prepared by **Chandra Mani**

May 2026

B.TECH(CSE 3rd YEAR)

Executive Summary

11,917

Customers Tracked

Total unique customers across all platforms

85%

Ajio Dominance

Market share on primary sales channel

64%

Women Shoppers

Top gender segment in customer base

51%

Saree Revenue

Flagship product category contribution

This report presents comprehensive analysis of e-commerce fashion sales across Ajio, Amazon, Meesho, and Flipkart platforms, offering insights into customer behaviour, revenue distribution, and channel performance.

Channel Distribution Analysis

Platform Performance

- **Ajio:** 85% share — dominant platform with highest customer engagement
- **Amazon:** ~15% share — strong secondary channel
- **Meesho:** Emerging channel with growth potential
- **Flipkart:** Small but present; scope for expansion

Category-Channel Distribution

Blouse 42%

Dominates channel-wise distribution with high demand across platforms

Set 13%

Significant multi-channel presence in product portfolio

Saree 8%

Strong cross-channel representation in ethnic wear

Ethnic Dress ~6%

Steady cross-channel representation with growth potential

Customer Demographics

Women

Dominant customer segment driving 2x volume of men

Men

Significant secondary segment in ethnic wear market

Age Distribution

Adult: Largest segment (primary buying cohort aged 25-50)

Senior: Secondary segment (mature shoppers active online)

Teenager: Smallest group (emerging demographic)

Revenue by Category

Saree 51%

Highest revenue contributor, flagship product line

Ethnic Dress 23%

Strong second performer, high-value complement

Bottom 14%

Solid mid-tier category with stable performance

Kurta ~6%

Steady performer worth maintaining

Strategic Insight: Saree + Ethnic Dress together account for ~74% of revenue
— these categories deserve priority in inventory planning and marketing spend.

Monthly Sales Trends

Order Fulfilment Performance

Delivery Status Overview

Analysis of 11,917 unique customers tracked delivery outcomes across all channels.

- **Delivered orders** dominate status distribution, indicating strong fulfilment operations
- **Cancelled/Refunded** appear as smaller slices — positive sign for operational health
- High delivery rate validates robust logistics partnerships

Strategic Recommendations

Channel Strategy

Double down on Ajio, invest in Amazon growth, run pilot campaigns on Meesho and Flipkart

Product Strategy

Prioritize Saree and Ethnic Dress expansion, introduce premium collections, bundle Blouse + Saree

Marketing Strategy

Deploy female-centric campaigns, develop senior shopper program, explore teen offerings

Conclusion & Next Steps

The e-commerce dashboard analysis reveals a healthy, growing fashion retail operation with clear strengths and defined opportunities.

01

Channel Diversification

Reduce Ajio dependency through strategic Amazon and emerging platform investments

02

Product Line Expansion

Focus on high-revenue categories (Saree, Ethnic Dress) with premium collections

03

Seasonal Planning

Align inventory with India's festive calendar for peak demand periods

04

Operational Excellence

Leverage strong delivery rate and optimize last-mile logistics

With focused execution on strategic recommendations, the business is positioned to achieve significant revenue growth and improved market penetration across all active sales platforms.
